

## **CellCyte Genetics Corporation Appoints Fred Mill as Vice President of Manufacturing** September 30, 2010, 9:15 am ET

Bellevue, Wash., September 30, 2010 BusinessWire -- CellCyte Genetics Corporation (OTCBB: CCYG) announced today the appointment of Fred Mill to the position of Vice President of Manufacturing, effective August 3, 2010. Mr. Mill will also continue in his present role of Director of Engineering, leading the ongoing development of the Company's CCG-E45 Culture Chamber and Incubator as new applications for the device arise. "I am very pleased to assume an expanded role in the application of CellCyte's bioreactor product" said Mr. Mill.

Fred Mill is an engineer with experience in design and manufacturing of a variety of products for the biotechnology and aerospace industry. From 1989 through 1998 he was lead design engineer for Cellpro, Inc. on their stem cell therapy products, and from 1997-2000 he was a consulting engineer for Genespan Corporation, where he was responsible for the design and manufacturing of the Cellstasis Culture Chamber and Incubator. Fred joined CellCyte in 2007 as its Director of Engineering.

CellCyte's CCG-E45 Culture Chamber is a cell expansion device that allows the culture of cells at high density and under precisely controlled oxygenation, providing an alternative to standard cell culture methods. CellCyte is developing collaborative relationships with other independent clinical research laboratories to apply this technology to a wide range of cell expansion applications.

Mr. Mill has been CellCyte's Director of Engineering since December 2007, and, since November of 2008, has helped refine CellCyte's Interim Operating Plan. This Plan defines how the Company will operate with limited funding over the near term, to continue the commercialization of its bioreactor product. Mr. Mill's appointment is the second of several planned appointments required to fully implement the Interim Operating Plan. CellCyte formally adopted the plan before the end of 2009.

"CellCyte is very fortunate to have Fred serving in this critical management role. Fred was part of the original design and manufacturing team that brought to market an earlier version of the CCG-E45 Culture Chamber and Incubator. Fred's leadership will ensure that the CCG-E45 and subsequent clinical productivity products will meet or exceed customer's expectations." said John M. Fluke Jr., Chairman of the Board of Directors.

### **About CellCyte Genetics:**

CellCyte Genetics Corporation, a Nevada corporation, is an emerging biotechnology company engaged in the principle business of the discovery, development and commercialization of products that enhance the productivity of biotechnology research laboratories.
